Real-Time Visibility to Changes in Supply & Demand

The WAM Supply Chain Planning Solution increased visibility over five manufacturing plants for a specialty chemical manufacturer through integration with the ERP system

A specialty chemical manufacturer with five manufacturing plants, producing a range of products for two distinct industries, selected WAM's solution to improve the performance of its supply chain operations by optimizing processes for planning and order management.

Business Drivers

Overcoming challenges inherent to balancing both Make-to-Order and Make-to-Stock in a specialized manufacturing cycle environment.

- Improve the overall supply chain planning process throughout the company
- Improve visibility to planners and customer service representatives
- Improve customer service levels with a chemical-focused solution
- Increase supply chain performance and increase EBITDA

Increased sales forecasting accuracy by 20%

Increased on-time shipments by 15%

Reduced inventory levels by 25%

Saved \$4 million in orders

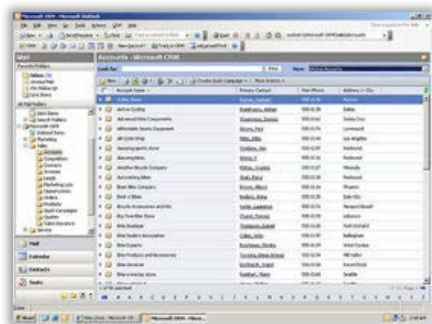

Provided real-time analytics to CSRs

Optimized complex scheduling over five plants

Solution

Working together with WAM's supply chain experts, the company established new work processes, implemented them throughout the organization and installed supporting technology to enable more effective supply chain planning.
