## **WAM Systems to Support PRISM ERP Community**

*WAM's PICASO™ Supply Chain Planning Solution Adds Value by Extending the Capabilities of PRISM ERP Systems*

**Plymouth Meeting, PA** -- WAM Systems, the leading provider of Internet-enabled supply chain planning (SCP) solutions designed exclusively for the chemical industry, today announced its support of the PRISM community website, [www.processERPuser.com](http://www.processERPuser.com), while promoting its PICASO™ product to users of the ERP software. The website, an ERP user forum, provides PRISM users with a source for independent information on technology and resources in the industry.

PRISM is an ERP system that was developed by former vendor Marcam for companies in the chemical industry. The PRISM community consists of users, technology suppliers, and users of PRISM, now provided by Baan Process. The website provides a meeting place for all PRISM users and is sponsored by a group of complementary software and service providers.

"WAM Systems understands supply chain planning in complex chemical manufacturing environments and developed the PICASO supply chain planning suite specifically for managing the operations for these companies," said John Campbell, co-founder and former executive vice president of Marcam. "I am pleased that WAM is supporting the PRISM web community in conjunction with its efforts to provide a competitive advantage to users with its advanced supply chain planning systems."

For the last 15 years, WAM Systems has been providing advanced supply chain planning solutions for many of the world's largest chemical manufacturers. PICASO extends the capabilities of ERP and legacy systems, making them more effective.

"The site contains a host of resources that help PRISM users save time and money," said Jack Weiss, CEO and founder of WAM Systems. "The community provides users with information gathered from industry experts

—more—

and analysts and an opportunity to exchange success stories and ideas that will extend PRISM's value into additional application areas. We are pleased to lend our support to PRISM users."

### **About WAM Systems**

WAM Systems, Inc. develops and markets Internet-enabled advanced supply chain planning solutions designed exclusively for the chemical industry. In its 15 years of operation, it has developed and perfected PICASO™, the premier advanced supply chain planning software used by large chemical manufacturers. The company was included in the 2001 "Software 500," Software Magazine's list of the world's foremost software and services providers. Customers include Basell Polyolefins, BP Amoco, Chevron Phillips, Cyro, Equistar, ExxonMobil, Lyondell, Pecom Energia, SABIC, and Solvay. The company is headquartered near Philadelphia, Pennsylvania.
