# AT Plastics Chooses WAM Systems for Supply Chain Initiative

*Leading Canadian Specialties Manufacturer Partners with WAM Systems to Implement its Picaso™ Solution*

**PLYMOUTH MEETING, Pennsylvania** — WAM Systems, the leading provider of supply chain planning solutions designed for the chemical industry, today announced that AT Plastics has selected WAM's Picaso™ solution to optimize its specialties supply chain.

The Picaso solution is designed to support AT Plastics' supply chain decision making and integrate with their BPCS® ERP system with the goal of reducing inventory and production costs while simultaneously increasing customer service levels. The comprehensive initiative will support the planning needs of AT Plastics' sales force, customer service organization, inventory planners, product managers, and production schedulers.

"AT Plastics places high value on innovative technology, manufacturing excellence, and the contribution of its people," said Gary Connaughty, CEO of AT Plastics. "We expect Picaso to contribute in a meaningful way as we continue to excel in each of these core values."

"Our selection of the Picaso solution was greatly influenced by its ability to quickly and easily model the complexities of chemical supply chains providing visual displays and powerful optimization capabilities," said Jim Hudson, VP of Supply Chain for AT Plastics.

"We are very pleased to welcome AT Plastics into the growing community of mid-size chemical manufacturers using Picaso," said WAM's CEO Jack Weiss. "Our initiative with AT Plastics further demonstrates the value Picaso brings to mid-market companies that employ advanced decision support technology."
