WAM SYSTEMS WELCOMES TC BAKER AS DIRECTOR OF INDUSTRY SOLUTIONS

Baker brings strong chemical and pharmaceutical experience to position

PLYMOUTH MEETING, PA —January 11, 2005 — WAM Systems, a leading supplier of advanced supply chain planning tools to the chemical industry, today announced the addition of TC Baker as Director of Industry Solutions.

Baker brings over 17 years of consulting, project management, software development, and entrepreneurial experience. His expertise spans many discipline areas from software development, business process consulting, product and project management, and marketing.

“It’s with great pleasure that we welcome TC Baker to WAM Systems,” said John Kamal, COO of WAM Systems. “He will be playing a key role in helping us pursue new opportunities, and will bring a great deal of perspective to a wide range of activities in the company.”

In 1988, Baker joined Aspen Technology, Inc.—formerly Chesapeake Decision Sciences—where, as both Director of Supply Chain Planning and MIMI Consultant, he was critical in supporting the development and implementation of the company’s toolkit for planning, optimization, scheduling, and forecasting. While there, he implemented numerous planning and scheduling prototypes and production models in the process industries, and assisted in the launch of Aspen’s ERP integration strategies. Baker was also Director of e-Business for the company.

Baker holds an MBA from Rutgers and a Bachelor of Science in Computer and Information Sciences from the University of Massachusetts at Amherst.

About WAM Systems

WAM Systems builds advanced planning tools designed to help chemical companies improve profitability, market share, and customer responsiveness. Founded in 1987, WAM has a long history of providing supply chain solutions to many of the world's leading chemical firms. WAM's customers include Basell, Chevron Phillips, DuPont, Degussa, Eastman, Equistar, Honam, KRATON, Lanxess, Lyondell, Petrobras, Polibrasil, Solvay and Wellman. WAM's supply chain software, Picaso™, is proven to improve profitability, competitiveness, and customer relations. Picaso has become the preferred chemical industry supply chain solution and is capable of supporting a wide variety of production operations. The company and its global partner network provide a full range of consulting, support, training and implementation services. WAM Systems is headquartered outside of Philadelphia, Pennsylvania. For more information on WAM, visit www.wamsystems.com.
