**WAM SYSTEMS ESTABLISHES GLOBAL
PARTNERSHIP RESOURCE NETWORK**

Industry-Leading Solutions Provided Through VAR Partnerships

PLYMOUTH MEETING, PA — November 21, 2006 — WAM Systems, the leading provider of supply chain planning solutions to the chemical industry, today announced the creation of its global Value-Added Reseller Network, a combined resource of companies which collectively represents decades of industry experience and industry-leading process solutions.

To further support its rapid growth over the last 3 years, WAM Systems has worked closely with leading companies throughout Europe and Asia to establish a global network of process consulting, support and technology solution providers capable of supplying an on-site presence for mid- to large-sized process companies involved in process improvement.

“We have been providing collaborative solutions with partner companies for several years now and have seen much success in the one-stop solution that it provides,” said Jack Weiss, CEO of WAM Systems, “As companies continue to look inward with process improvement initiatives and ROI analysis as they adopt systems such as SAP and APO, they inevitably find the need to accommodate the white space that larger systems overlook. WAM (Systems) has positioned itself as a trusted resource that companies can turn to for help in clarifying those needs and finding the best solution to address it. As those needs can vary greatly from company to company we’ve found the best approach is

having alternatives from which to choose, and thus is the success of the offering we bring to the table through our global partnership network. ”

With a growing online community of partner solution providers, WAM Systems can continue to maintain a comprehensive array of technology and process-improvement options for its customers, and can field expertise throughout the world in support of the industry’s improvement initiatives.

About WAM Systems

WAM Systems, Inc. develops advanced supply chain planning solutions designed specifically for the chemical industry. WAM’s Picaso™ solution is used throughout the global chemical industry, providing a broad set of visualization, decision support, and optimization tools that address the unique challenges found in managing complex chemical supply chains. Picaso solutions address a wide range of business processes including collaborative demand management, inventory and distribution optimization, production planning and scheduling, and procurement planning. The company and its worldwide partners also provide a full range of consulting, support, training and implementation services. WAM’s customers include Basell, Celanese, Chevron Phillips, DuPont, Degussa Engineered Carbons, Eastman, Equistar, Honam, Lanxess, Lyondell, Petrobras, Solvay, and Wellman. Founded in 1987, WAM Systems is headquartered outside of Philadelphia, Pennsylvania. For more information on WAM, visit www.wamsystems.com.
