

Identifying the **hidden value** in your **chemical supply chain**

Extended Visibility for Your Supply Chain Network.

PICASO™ @ WORK

▶ "The powerful combination of Picaso™ integrated with our SAP ERP system provides a solution not available in any single tool."

▶ "The Picaso™ optimization modules paid for themselves within the first year of use."

▶ "WAM Systems' Picaso™ offered the ideal solution to quickly install and begin helping our planning staff while we continued to move forward with our SAP / APO initiative."

▶ "Our selection of

Process Industry Embraces Expanded Scope of Picaso™

Leading chemical industry planning solution now available to all process manufacturers

Building on the success WAM has achieved in helping the chemical industry with supply chain planning solutions, the company has positioned its flagship product line to address the expanded needs of the entire process industry.

- Chemical / Polymer
- Oil & Gas
- Pharmaceutical
- Food & Beverage
- CPG
- Personal Care
- Cosmetics
- Construction Materials

As companies address process improvement through the adoption of large-scale ERP systems and planning solutions like SAP / APO they strive to balance the complexity and functionality of their technology installations.

Throughout the process industry, companies have sought best-of-breed solutions that understand the workflow and unique needs of process supply chains. WAM Systems steps up to that challenge with its preferred solution, Picaso™, now offering the same visualization and optimization solutions known throughout the chemical industry to the wider audience of process manufacturing companies.

Build Consensus for Process Improvement within Your Company

See how companies have overcome inertia problems to achieve dramatic improvement

Many process manufacturing companies are struggling with the challenge of building consensus to improve their planning processes and toolsets.

Supply chain teams have long realized the need for improvement and the value of best-of-breed technology. The bigger challenge remains to establish a recognizable need in the larger enterprise for the value of process and toolset improvements.

the Picaso™ solution was greatly influenced by its ability to quickly and easily model the complexities of chemical supply chains, providing visual displays and powerful optimization capabilities."

► "Excellent expertise. WAM's consultants all are ex-SCM users and experts. They know the tools and the business."

WAM Systems has helped numerous companies navigate these challenging waters, and has developed its multi-faceted approach to analysis and benchmarking into the WAM-ID Process™. For companies willing to embark on a quick and powerful assessment of their current planning processes, the benefits are clear. Real value can be quantified and then achieved through a careful marrying of analysis, process improvement and implementation of supporting technologies.

The WAM-ID Process™ is a concise yet thorough analysis of a company's existing supply chain operation which is designed to help key executives evaluate the potential for process and technology improvement in a format that can build enterprise-wide consensus.

Learn more about the WAM-ID Process™ and how it can quickly and easily be launched inside your company to address the concerns and potential of your supply chain planning organization.

Growing Industry Solutions Network

Global footprint of industry solution providers expands options for WAM's clients

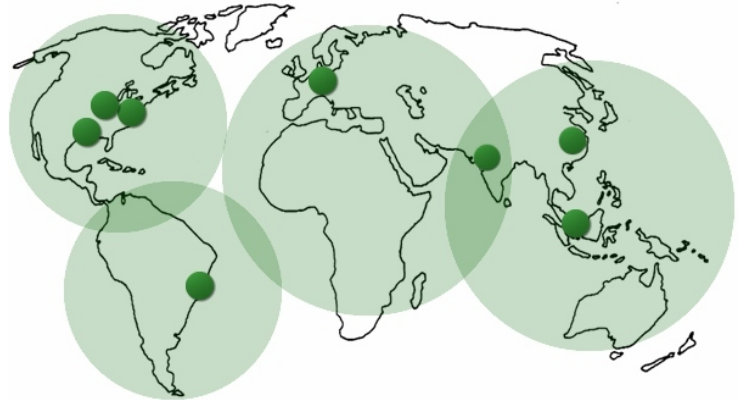

To continue to enhance its enterprise solution, WAM Systems has announced the creation of a global Value-Added Reseller Network, a combined resource of companies which collectively represents decades of industry experience and industry-leading process solutions.

Ranging in location from Europe to the Americas to Asia, our partner companies help WAM extend the process and technology solutions that have become the leading planning solution in the chemical industry.

Included in the list of partners are European-based Silvitech, Quaris Corporation and AIXONIX as well as long-standing partners Honeywell (US and Asia Divisions), AID Corporation, Profit Point, Inc. and South American based Soteica.

"The technology and expertise that these companies bring to the table enables us to provide on-site support and solutions to our customers with specialized functionality that employs each partner's offering. The Network has given us an added capability that is essential to deliver WAM value worldwide." said company CEO and Founder Jack Weiss.

WAM Systems is conducting a series of benchmarking surveys with process manufacturing companies throughout the world in an effort to assess the overall maturity of industry supply chain practices. The purpose of these surveys is to help each company compare its supply chain process maturity with that of its industry peers. Each survey is composed of a telephone interview and final report loaded with demographic and benchmarking data, and is kept confidential to the participating company.

The surveys currently underway are in the areas of:

- Demand Management
- Sales & Operations Planning (S&OP)

Sign-up now to participate and receive your personalized company report.
